

ENVIRONMENT POLICY

S.I.A. Safety Industrial Applications S.r.l. (SIA) operates on a national and international level in the fire prevention field designing, manufacturing and installing fire fighting equipment in accordance with international regulations and carrying out the relative maintenance after the systems and equipment have been installed.

Together with Quality, environment safeguard is of primary importance in Company management. The application of environment safeguard criteria is vital to guarantee:

- environment conservation
- minimization of environmental impact
- pollution prevention
- production process control
- According to their own activity, the whole staff must assure application of environment protection actions.

Management declares that:

- The Environment Policy is suitable for the nature, the size and the environmental impact of our Company's activities, products and services.
- Current and future production purposes must be consistent with the environment quality standards set by Laws and Regulations.

In order to guarantee the maximum effectiveness of the Environment System, Management commits itself to:

- continuous improvement of environment performances and to always prevent pollution
- to produce goods and/or services with the lowest environmental impact
- to inform, train and motivate the whole staff to perform their duties respecting the environment
- to discuss environment upgrading purposes
- to document and put Environment Policy into practice and maintain it active
- to promote transparency with employees and public on environmental issues
